Design

We are experienced in providing our clients with effective packaging designs, which are right for their product and market. Our experience includes packaging design for products within the retail, leisure, lifestyle, healthcare and industrial sectors. We also offer a packaging production service.

Essential functionality

However, it is not just the graphics which are important. The packaging must be highly functional, so we consider each of the following factors in the design:

▣ Physical protection

- Robustness
- Resistance to shipping & handling
- Barrier protection from contamination
- Security

▣ Graphic design

- Market appeal
- Product information

▣ Package marking

- Regulatory requirements
- Barcode

▣ Ease of product removal & assembly

▣ Low volume - cost effective shipping

▣ Carton size

- Distribution
- Manual handling requirements

▣ Environmental considerations

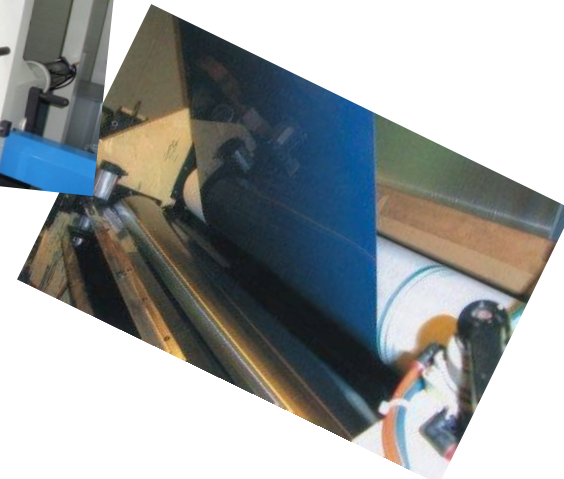

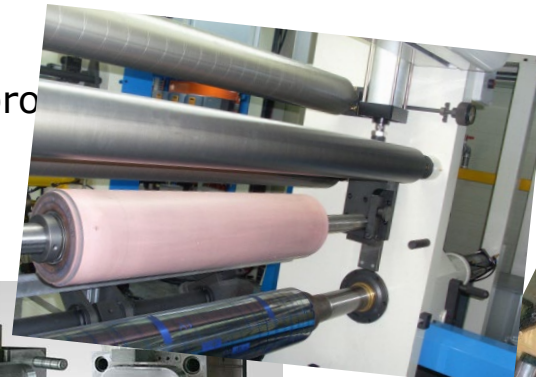

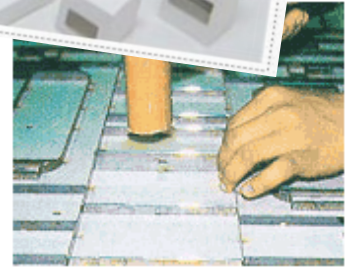

- The 3 Rs - reduce, reuse, recycle
- Minimize packaging

Tooling and Sample (Pre-prod.)

We are one stop services thus we can provide tooling and initial sample, pre-process mass production or actual product step by step:

- ❑ **Mock Up**
